

IARD 2008

International Association for Relativistic Dynamics

6th Biennial Meeting
22 - 26 June 2008
Thessaloniki, Greece

Call for Papers

Bringing together researchers from diverse fields whose interests and applications involve classical and quantum relativistic dynamics

- High-energy electron interactions
- Quark-gluon plasma in heavy ion collisions
- General high energy scattering and particle decay
- Theoretical aspects of general relativity, quantum field theory, conformal field theories and string theory, manifestly covariant classical and quantum theories, and relativistic dynamics

Organizing Committee

Ioannis Antoniou,
Aristotle University, Greece

John Fanchi,
Colorado School of Mines, USA

Tepper L. Gill,
Howard University, USA

Lawrence P. Horwitz,
Bar Ilan University, Israel
Tel-Aviv University, Israel

Martin C. Land,
Hadassah College, Israel

James A. Lindesay,
Howard University, USA

Ronald L. Mallett,
University of Connecticut, USA
